The American people, so far as I know, were all several that their visitory brought with it the responsibility of protecting the liborared peoples from the cupidity of any other power until they could extablish their own independence in treadom and in honor. I stand here to piesd with you not to abundon the principles that have brought those things to pass. I implore you to keep to the palter that has made the country great, that has made the republican party great it that has made the president great. If, when we made the treaty of peace, we had adhered to the outrone we declared when we declared war, it we had dealt with the Philippine islands as we promised to deal, have dealt and expect to deal with Cube, the country would have escaped the loss of 400 brave soldiers, other thousands of wrecked and shattered lives, the sickness of many more, the expenditure of hundreds of millions, and, what is far worse than all, the trampling under foot of its cherished ideals.

I do not expect to accomplish anything for liberty in the Philippine islands but through the republican party. Upon it the fate of these islands for years to come is to depend. I cannot look with any favor upon Mr. Bryan as an alternative. I believe not only that perseverance in the present policy will be the abandonment of the principles upon which our government is founded, that it will change our republic into an empire, had out those which belong to empire, and not those which belong to empire and not those which belong to republica, the it will change our republic into an and evert
